

FOOTSTEPS SCHOOL

WHERE EVERY STEP IS NURTURED

About Us

Footsteps is a primary educational institute that provides students with an enriching and holistic learning experience in a warm, secure and nurturing environment. With a focus on our students' social, emotional and cognitive development, early childhood learning strategies are employed to build a sound academic foundation whilst harnessing each child's individual potential.

Our Curriculum

The school's curriculum has been designed collaboratively by leading professionals in the field to seamlessly combine features of Montessori and Early Childhood Education (ECE). The curriculum is implemented by qualified and experienced teachers through an expansive range of resources and materials in the classrooms. This ensures that students benefit from the proven, unfailing academic discipline of Maria Montessori and the experiential activities and social awareness brought forth with ECE principles, promoting holistic development of our students. The combined curriculum nurtures positivity, creativity and critical thinking for all learners, regardless of their learning style.
